SUMMARY

I am a passionate Computer Science student with a strong motivation to become an outstanding Software Developer. My approach is based on constant learning and the practical application of my knowledge in the field of programming. I am excited by the opportunity to contribute to innovative development projects and continue to expand my skills.

SKILLS

Frontend: HTML5, CSS, Vue, React, React Native, Vanilla JS, Jest, Typescript, Tailwind, Bootstrap

Backend: Express, Node, Python, Java, C#, MongoDB, MySQL

EXPERIENCE

Freelancer – Full stack Developer (2022 - present)

- Responsible for developing the complete architecture of web systems incorporating appropriate technologies according to the client's needs.
- Use of Express, React, MongoDB, Node, Vanilla Js, TailwindCss, for optimal software construction, through clean code and good practices.
- Construction of a CRM architecture, using MongoDB, Express, React, Node, Vanilla JS and Tailwind, applying user validation with JWT, API with CRUD functionality and functions necessary for user validation created from scratch

Freelancer – Frontend Developer (July 2020- Dec 2021)

- Developing web components and landing pages and static pages with Vanilla Js, React and Tailwind.
- Implementation of good Html practices and teaching colleagues in HTML, JS, CSS and REACT, doing small projects with important functionalities..

EDUCATION

Enterprise Computing – University of Costa Rica (UCR).

Medium Technician in Business Informatics – Professional Technical College of La Fortuna

Programing with modern Javascript– Udemy

SOFT SKILLS

Problems resolution

Ability to analyze and address complex problems systematically and efficiently.

Teamwork

Demonstrated collaboration on group projects, contributing ideas and contributing to team success.

Fast learning

Ability to absorb new concepts and technologies quickly, backed by a strong desire to continually improve.

TAKE ACTION

Tutorials and programming classes

I usually help university students with short classes and clarification of doubts about specific programming topics in languages such as Java, JS or C#.

Participant in talks and active in courses

I am always looking to attend most events or talks where I can learn, as well as looking for courses that help me grow in my specialty.

Personal projects

Practice is very important to develop and keep fresh the knowledge we acquire, so I constantly look for new challenges and projects to develop and practice.
